

# ESSENTIAL

Is protecting your second-largest corporate cost center and employee productivity important?

**If so, contact us today!**

## Did you know that for most businesses, IT is the second-largest budget item after employees?

McNallan Technology Solutions provides your first line of defense, protecting your IT investment.

### Why SMBs are adopting Managed Services:

Approximately 7 in 10 end-user organizations today contract with a MSP for some or all of their technology needs, according to a recent survey report published by CompTIA.

The CompTIA study found that nearly 50% of the current users of MSPs have reduced their annual IT expenditures by 25% or more as a result of their shift to managed services.

These savings and other business benefits have driven more than 60% of the current users of MSPs to plan to increase the proportion of their IT operations managed by MSP over the next two years.

### McNallan IT Features:

- **IT Health Report:**  
Receive a quarterly report on the health of your technology, including Network Health, Warranty, and Lifecycle Management reports.
- **IT Health Dashboard:**  
Get a real time view into the status of your business's IT with our enterprise class monitoring & management solution.
- **IT Responsive Support:**  
Our helpdesk and team of engineers are available to assist with all of your support needs. Remote support is a click away!

### McNallan IT Benefits:
